Profile

Software Engineering student with a focused background in mobile and software development. Proficient in Python and C++ with a solid foundation in Data Structures and Algorithms. Adept at building cross-platform solutions, managing cloud-based tools like Docker, and optimizing application performance. Proven ability to deliver end-to-end projects, ranging from API-integrated navigation apps to automated classification models.

Education

Harper College

Bachelor of Science in Computer Science (in progress)

Palatine, IL

Aug. 2024 – Present

Work Experience

Information Technology Support Specialist

Prospect Heights School District 23

June 2022 – Aug. 2024

Prospect Heights, IL

- Supported daily IT operations while communicating with teachers and staff to diagnose technical issues and explain solutions.
- Helped troubleshoot basic network issues and software installations

Projects

NotesHub | Python, Kotlin, TensorFlow Lite

Nov. 2025 – Jan. 2025

- Trained a custom NLP text classification model in Python and deployed it to Android using TensorFlow Lite
- Designed a consistent preprocessing pipeline to ensure identical inference results between training and mobile deployment
- Trained on 2.5k samples and achieved 80% validation accuracy.
- Enabled offline, low-latency on-device inference with automatic note categorization.
- Debugged cross-platform inference issues using token-level validation and model checksum comparison.

Local Explorer | Swift, SwiftUI, Google Maps SDK, Google Directions API

June 2022 - Aug. 2024

- Developed an iOS app that integrates Google Maps to display nearby restaurants, hotels, and attractions.
- Implemented dynamic filtering by category and route generation using Google Directions API.
- Designed a clean, accessible SwiftUI interface with map-based navigation and category-driven UI updates.
- Integrated APIs and handled data persistence for location-based results. Including parsing and transforming JSON data for display in the app.

Technical Skills

Languages: Python, C++, HTML/CSS,

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, PyCharm,

Libraries: Pandas, NumPy, TensorFlow, TensorFlow Lite

Databases: SQL (basic),

Frameworks/Tools: SwiftUI, Google Maps SDK, Google Directions API, Xcode, Jupyter

Additional Info

Languages: English (Fluent), Ukrainian (Native), Russian (Fluent)

STEM Scholar - Harper College

Member, American Association for the Advancement of Science (AAAS)
